

M. J. M. ELECTRIC COOPERATIVE, INC.

SECTION III- MEMBERS AND CONSUMERS

Policy 28 Approved 12/30/1969

Effective: 02/01/1970

REVIEWED: 11/29/2018

REVISED: 07/26/1972 10/26/1978 02/26/2015

TEMPORARY SERVICE FOR BUILDING CONSTRUCTION

POLICY

It shall be the policy of the Cooperative to cooperate with its Members in providing temporary service for building construction provided request for such service is reasonable and does not involve excessive expense to the Cooperative.

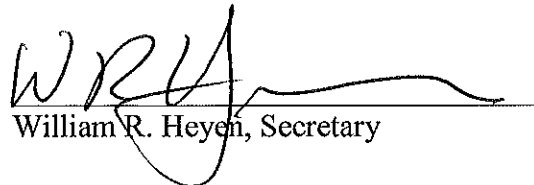

RESPONSIBILITY

President/CEO and Management

PROCEDURE

The Cooperative will provide temporary service under the following conditions and charges:

1. For Members desiring temporary service for building construction, when permanent service connections are not available. A connection fee must be paid before the temporary service will be connected.
2. The Cooperative will engineer construction of service facilities so that, insofar as possible, permanent construction can be completed.
3. Contractor or builder will be required to set a temporary pole with approved temporary meter installation provided with protection fuses or circuit breakers attached thereto at a location approved by Cooperative's representative. Temporary pole must provide code clearance and be of sufficient strength to support Cooperative's drop.
4. It shall be the responsibility of the Member to provide service from the temporary metering point to the construction site.
5. The Cooperative will connect permanent service per current line extension policy.
6. The Cooperative's applicable electric service rate schedules shall apply for all electrical service used.

William R. Heyen, Secretary
